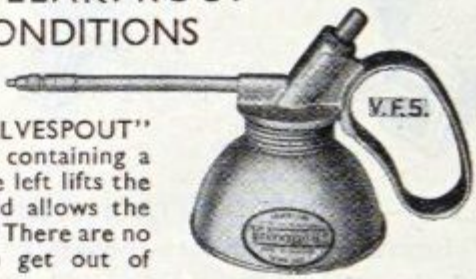
"VALVESPOUT" OILERS

ABSOLUTELY LEAKPROOF UNDER ALL CONDITIONS



As its name implies "VALVESPOUT" is simply a brass spout containing a valve, thus a turn to the left lifts the valve off its seating and allows the contents to be ejected. There are no springs or washers to get out of order.

Containers are of deep drawn steel, extremely strong and high pressure die cast head on which comfortable, durable and strong handle is formed, all parts interchangeable ensuring lifelong service. Neat, clean, efficient.
